

Project 2 Discussion

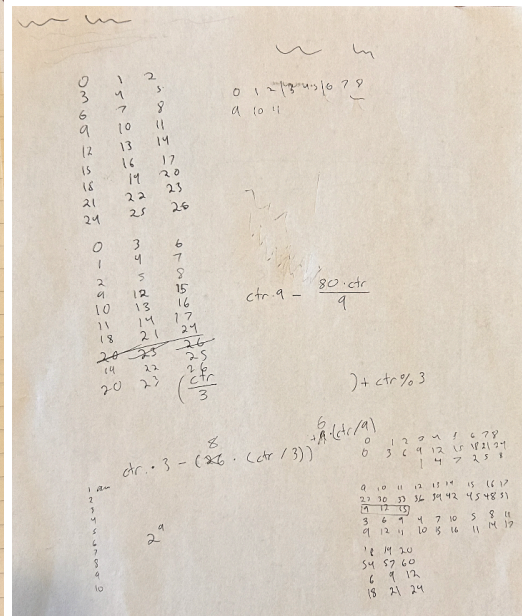

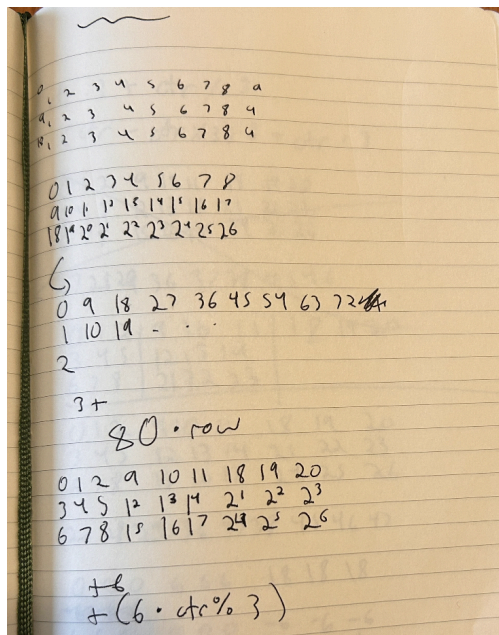

Friday 3/8:

Time: 2:58 PM

Location: Stud

What we did:

- Started project
- Started figuring out single-threaded approach
- Worked out how the arrays worked

Saturday 3/9:

Time: 5 PMish - 1:30 AMish (sat into sun? Could not check times TT)

Location: Remote :/ we called on discord to share screens and work together

What we did:

- Continued working on other approaches
- Around 5:30 PM, finished single-threaded approach
- Around 11:40 PM, finished multi-threaded approach
- Around 12:45 AM, finished multiprocessing

Sunday 3/10:

Time: 2:41 PM - 5:18 PM (on call);

Location: Remote (utilized discord once again)

What we did:

- Finished shared memory
- Created statistical experiments
- Generated sample sudokus to test all approaches
